Ojayit Telang

Software Engineer

ojayittelang@gmail.com — +91-8369965442 — Mumbai, India — LinkedIn — GitHub

Education

Sardar Patel Institute of Technology (S.P.I.T) 2024 – Ongoing

B.Tech in Electronics & Telecommunication Engineering

Minor in Computer Engineering

Lilavatibai Podar High School 2022 – 2024

I.S.C – 89.75% — I.C.S.E – 96.40%

Experience

AI/ML Intern, Quantum Four Analytics & KD Logistics June 2026 - July 2026

- Developed an Automated Number Plate Recognition (ANPR) system using YOLO, EasyOCR, and OpenCV.
- Performed large-scale image annotation and dataset preparation for robust license plate detection.
- Optimized the OCR pipeline through image preprocessing and post-processing to improve recognition accuracy.

Research Intern, SP Jain Institute of Management & Research (SPJIMR) July 2026 – Present

- Assisted Dr. Arunima Haldar in research on Environmental, Social, and Governance (ESG) practices and sustainability within the banking industry.
- Conducted literature reviews, analyzed ESG frameworks and banking datasets, and contributed to research documentation and report preparation.

Research Intern, GoGreen Technologies Pvt. Ltd. July 2025 – Aug 2025

- Integrated Generative AI into IoT systems, reducing coding effort by 40%.
- Built AI-assisted IoT code generation workflows for scalable deployments.
- Demonstrated 10+ IoT projects to 100+ attendees at a technical exhibition.

Selected Projects

Nexus: Automated Clearance Protocol 2026

- Built a full-stack workflow automation system using the MERN stack and REST APIs.
- Implemented RBAC, multi-stage approval pipelines, and real-time status tracking.
- Designed a responsive UI to streamline complex administrative workflows.

LearnifAI 2026

- Developed an NLP-driven adaptive learning platform to identify conceptual gaps.
- Implemented prerequisite graph modeling and personalized learning path generation.
- Integrated Voice AI APIs for real-time conversational tutoring.

KumbhSaathi 2026

- Built an AI-powered multilingual assistant for pilgrims using RAG, LLMs, and geospatial search.
- Implemented offline-first assistance, crowd-aware navigation, emergency support, and location-aware guidance.
- Integrated voice interaction with real-time information retrieval for seamless user support.

Power Theft Detection Circuit 2025

- Designed an embedded system for detecting voltage-current anomalies using sensors and analog circuitry.
- Implemented microcontroller-based monitoring for real-time fault detection and alerts.
- Improved signal acquisition accuracy for reliable anomaly detection.

Activities

- Events Head, CSI SPIT 2025 – Present
- Head of Subcommittee, IEEE SPIT 2025 – Present
- Teaching Assistant, Prof. Kaisar Katchi 2025 – 2026
- PR Subcommittee Member, IETE SPIT 2024 – 2025
- Data Acquisition Team, Alumni Relations Cell SPIT 2024 – 2025

Skills

Programming: C/C++, Python, Java, JavaScript, SQL

Web/Tech/App: MERN Stack, REST APIs, Git, Flutter

AI/ML: Machine Learning, NLP, Image Processing, Computer Vision, OCR

Analytical Skills: Business Analysis, Process Automation, Market Research, Problem Solving

Hardware: Verilog, VHDL, ESP32, Analog Circuits, Sensors

Tools: VS Code, MATLAB, Excel

Achievements

- Winner – Fortune '26 Case Competition, DTU
- Winner – Best UI/UX, SPIT SE Hackathon
- Top 4 Teams – Synergy Hardware Hackathon, FRCRCE
- 2nd Runner-Up – Merge Mania Case Study Competition
- Finalist – Claude Impact Labs Hackathon (Anthropic)
- Finalist – SCOE Hackathon
